

FOR IMMEDIATE RELEASE
June, 2009

MedShare's advanced home care solution assists Community Rehab in achieving service excellence

*After the successful launch of a sophisticated software for home care agencies,
MedShare and Community Rehab team up to put software in the home offices of health care workers*

<Cambridge, Ontario> MedShare Inc. and Community Rehab have partnered to launch MedShare's most advanced client management software to date.

Barbara Ruttan, senior vice president, rehabilitation, notes "In keeping with our vision of rehab excellence and innovation, we needed a software solution that would assist us in providing excellent client services where and when they're needed."

With their new software system, community-based occupational therapists, physiotherapists, dieticians, social workers and speech language pathologists are now able to access MedShare HC, the central client information system chosen by Community Rehab, from their home office. Using a standard Internet connection and a personal computer, home care workers can access client information and the referral that used to be accessed only from the branch office or via fax machine.

MedShare HC provides immediate access to client medical records and includes remote data capture, automatically updating central databases and reducing duplication of effort. MedShare HC is now fully deployed in over 250 home offices of Community Rehab therapists and across four branches of the agency. Security is ensured through strong password creation, data encryption, and business processes that meet HIPAA and PHIPA standards.

As a new member of the Saint Elizabeth Health Care family, Community Rehab's use of the MedShare software also provides a common link for interdisciplinary teamwork, synergy and exchange across the two organizations. For example, MedShare is the basis of an e-charting application currently being piloted by Saint Elizabeth Health Care.

According to Ms. Ruttan, "staff value the new system as it provides easy access to client information and documentation in one convenient location – empowering them with the tools and information they need to make the best decisions for client care."

About Community Rehab

Forward-thinking and people-focused, Community Rehab is an interdisciplinary Canadian home health care organization that has been a leader in rehabilitation since 1985. In 2008, Community Rehab and Continuum, a division of Community Rehab, joined the Saint Elizabeth Health Care family and continues to operate as an independent organization focused on rehab excellence, innovation and collaboration. With five offices throughout Ontario and a dedicated team of 300 therapists, including occupational therapists, physiotherapists, dieticians, social workers and speech language pathologists, Community Rehab delivers more than 200,000 therapy visits to approximately 35,000 clients annually.
