e-Health information – changing the face of home health care.

MedShare™ can help you make it a change for the better.

Electronic health information makes our whole health care system more efficient and more cost-effective. It gives caregivers more time to do what they do best – deliver care to their clients. It gives managers more timely and accurate information. It simplifies essential processes like scheduling, billing, payroll and invoicing. The electronic health record (EHR) itself improves accuracy of clinical data and enhances collaboration within health care teams.

It's a wonderful destination. The question is, how do we get there?

*For home health care agencies,
that's a question with a lot of
tricky answers.*

MedShare – helping you get it right.

For home health care agencies, the question of electronic agency management is really many questions at once:

- ❖ Can we afford the initial investment in hardware and software, and to change over our existing files and processes?
- ❖ Will the new system stay current, and not quickly become obsolete?
- ❖ Is the system designed to meet the special requirements of home health care, or is it just an adaptation of something made for hospitals, laboratories and clinics?
- ❖ Will it meet our critical standards of privacy, security and connectivity?
- ❖ And is it user-friendly? Will our home care therapists, nurses and personal service workers understand it right away?

*To all these questions,
the MedShare answer is Yes.*

*Implementation of Electronic Medical
Records created a clinically driven IT culture where nurses who are
valued, rewarded, engaged and focused deliver high-quality, timely care.*

Introducing MedShare HC – the complete IT solution designed exclusively for home health care agencies

MedShare HC is a full suite of IT business solutions designed from scratch to meet the special needs of home health care agencies.

MedShare HC gives you everything you need to effectively manage the core business and clinical processes of your agency – client data, service orders, billing, payroll, scheduling, client assessments and care plans/clinical pathways.

Your agency will immediately reap significant operational benefits, including reduced paperwork, less time spent on administration, more accurate information and enhanced communication and collaboration among agency staff.

And MedShare HC is scalable, allowing your agency to migrate to a fully electronic information-sharing system by stages.

Optional modules for added functionality.

Optional modules in the suite add to your agency's clinical efficiency.

- **MedShare eHealth Records portal** gives your staff the ability to access and update client health records – including client history, medical records, referral information, assessments and notes.

- With **MedShare HC Mobile**, you can take this information on the road – access records in the morning, modify them throughout the day, and synchronize changes in the afternoon.
- The **MedShare HC CareLink** device is a two-way communicator and service delivery confirmation system, designed for Personal Support Workers (PSWs) in home care settings. The device contains a barcode reader that confirms the PSW's arrival and departure times and task-fulfillment. The device automatically transmits this information to the Agency server to update billing and payroll data.

MedShare HC is your complete business solution – designed exclusively for home health care agencies.

By computerizing health records, we can avoid dangerous medical mistakes, reduce costs, and improve care.

MedShare HC. Making home health care agencies more efficient – more effective – more profitable.

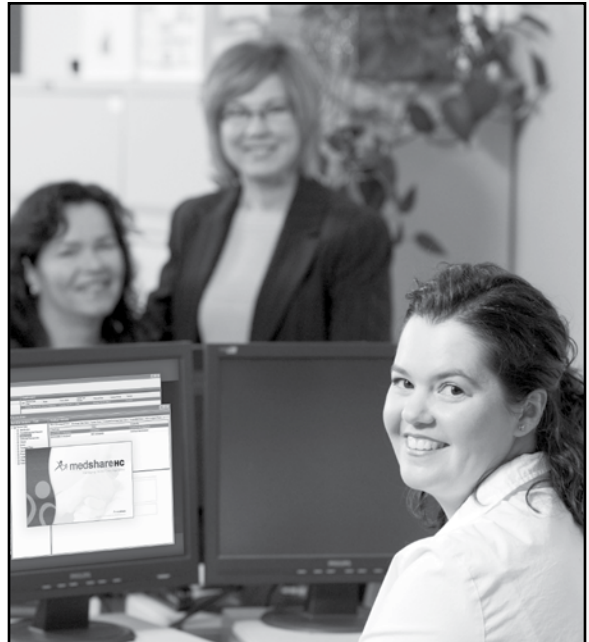

MedShare HC is a comprehensive business platform designed specifically for the home health care sector. It's not simply a hospital system re-jigged for home health care. MedShare HC addresses your specific business needs, and delivers specific and effective solutions.

Affordable. MedShare HC is offered as a subscription service. That minimizes your initial investment and spreads your transition costs over time. A monthly fee, based on your size and need, gives you access to a customizable set of information-management modules.

Future-Proof. MedShare HC is based on the latest Microsoft® SmartClient technology – open-ended and designed for incremental upgrading

In our view, 100 percent of the population should have an electronic health record by 2010.

— Health Council of Canada

Security & Connectivity. All data is encrypted at a security level exceeding that required by Canadian and U.S. government regulations. And MedShare HC meets all industry standards and protocols currently being established, to give you maximum connectivity across the health care system.

User-Friendly. If you can use Windows®, you can use MedShare HC. The MedShare HC interface is intuitive and visually attractive, utilizing many of the basic commands and procedures already familiar to Windows® users.

Greater efficiency means better care for your clients – higher job satisfaction for your employees – a better bottom line for your agency.

MedShare HC - Better Care Comes Home

MedShare.

Better outcomes – for clients, for caregivers,
for home care agencies.

MedShare is a software company providing electronic agency management and e-health record (EHR) solutions to meet the business and clinical needs of home health care agencies.

MedShare was founded to fill the gap left by other providers of information systems, who have designed more general technologies to meet the needs of the health care industry's largest players – hospitals, pharmacies, laboratories and HMOs. At MedShare, we design our solutions exclusively for the home health care sector.

MedShare – home health care is what we're all about.

MedShare solutions make home health care agencies more efficient – in both administration and clinical care. So home care workers spend less time on paperwork and more time caring for their clients.

So clients get better care and home care workers get greater job satisfaction.

Because information shared electronically is more accurate and can be better managed and accessed, agencies gain efficiencies. Improved efficiency means more accurate budgeting and estimating, more rational staff assignments and scheduling, better cost control, faster and more accurate invoicing, and the ability to service more clients. And that brings a better bottom line for your agency.

MedShare is committed to better outcomes across the home health care sector – for agencies, for your employees, and for the clients who depend on you.

MedShare believes in home health care. Because just like you, it's what we do.

*Information technology can
accelerate development of a quality
home care system. ... The real beneficiaries
of [an electronic health] record are the clients, as a shared,
integrated record raises the quality of care and lowers the risk of errors.*
